On HF, push-pull 2SC5125 Bipolar transistors driven by push-pull 2SK2975s provide the 100-Watt power capability, while on VHF maximum efficiency during battery operation is yielded by 2SC3102 bipolar PA transistors.. Rugged, High-Output Power Amplifier Achieving 100 Watts of power output from such a compact package is a difficult mechanical and electrical engineering task.. And to extend the impedance bandwidth of your antenna system, the innovative FC-30 Automatic Antenna Tuner option clamps onto the left side of the FT-897 in seconds! Yaesu ft 897 manual.
